address

Dear Sir/Madam,

I am writing to apply for the Erasmus Program for my third year in Computer Science at « ăLa Province de Liège Higher Education Institutionă ». My aim is to seek a Master's degree in Computer Science and then, to work in game development. The stage offered by your company would be a good preparation towards this aim.

My greatest desire would be to integrate a motivated development team in the field of video game development and your stage offer seem to be exactly what I'm looking for.

I practice programming for roughly 7 years. Since then, I have experienced a lot of different techniques and language like Python, C/C++, C#, Java, PHP, Ajax. I also had the opportunity to develop a lot of different projects in various areas like image processing, real-time processing, game and website. Some of them were developed in a team. I am confident that my educational background is in keeping with your requirements.

I am highly motivated, hardworking and reliable, and I would particularly welcome the opportunity to work in a motivated team in the field of game development. I am confident that your team will benefit both from my enthusiasm and my abilities.

I hope you will view my application favorably and I look forward to hearing from you. I can be reached at this email address thomasvangysegem@gmail.com

Yours faithfully,

Matthew J. Miller
